

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

**Base Year Modification Request Certification**

**Part 1: Generation Study - No Extrapolation Diversion Data**

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

**California Integrated Waste Management Board**  
**Office of Local Assistance**  
**1001 I Street, (MS-25)**  
**PO Box 4025**  
**Sacramento, CA 95812-4025**

**General Instructions:**

Please select the ONE choice below that best explains your request to the Board.

1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.  
 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199.

**Section I: Jurisdiction Information and Certification**

*All respondents must complete this section.*

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name <b>Walnut Creek</b>	County <b>Contra Costa</b>		
Authorized Signature 	Title <b>Executive Director</b>		
Type/Print Name of Person Signing <b>Janet Schneider</b>	Date <b>9/20-02</b> Phone ( ) include Area Code <b>(925) 906-1801</b>		
Person Completing This Form (please print or type) <b>John Hanscom</b>	Title <b>Waste Prevention and Recycling Specialist</b>		
Affiliation: <b>Central Contra Costa Solid Waste Authority</b>			
Mailing Address <b>1280 Civic Drive, Suite 210</b>	City <b>Walnut Creek</b>	State <b>CA</b>	ZIP Code <b>94596</b>
E-Mail Address <b>authority@wastediversion.org</b>			

**Section II: Information for New Generation-Based Study for Existing or New Base Year**

Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").

*Note: New base years must be representative of a jurisdiction's disposal and diversion.*

1. Current Board-approved existing base year:	2. Proposed new generation-based study year:
1990	2000

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

There were significant waste generation events in Walnut Creek during they year 2000. This study is only intended to calculate Walnut Creek's 2000 diversion rate and therefore has no effect on annual averages.

**4. Enter diversion rate information below.**

Diversion rate calculated using existing base year	a. 43 %	Diversion rate calculated using new generation-based study	b. 47 %
For existing base year pounds/person/day based on generation	9.15	For new generation based study pounds/person/day based on generation	11.2
Residential generation 55 % Non-Residential generation 45 %		Residential generation 55% % Non-Residential generation 45% %	
Population existing generation-based study 60569		Population new generation-based study 64700	

5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).

The diversion tonnage reported in Walnut Creek's 2000 generation study is directly reported from recycling companies and city agencies. Because these are actual tonnages from actual diversion programs we feel that the 47% diversion rate is consistent with our current diversion implementation efforts. We did not quantify other diversion programs such as xeriscaping, thrift stores, or private commercial source reduction programs.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

The CCCSWA's diversion programs conducted on behalf of Walnut Creek contribute to the difference in the rates when the generation-based calculation is used rather than the disposal-based adjustment method. For example, in 2000 Walnut Creek was able to track 11,418 tons of asphalt and concrete diversion from their Capital Improvement Projects, which contributed about 6 percentage points to their diversion rate alone. Other Walnut Creek programs have been implemented and promoted through CCCSWA for many years.

**Board Meeting  
December 10-11, 2002**

**Agenda Item  
Attachment 2**

<b>7. Disposal Tonnage (enter values):</b>	36868	<b>Residential</b>	<b>31801</b>	<b>Non-Residential</b>	<b>Total</b>	70669
--	-------	--------------------	--------------	------------------------	--------------	-------

Please select the ONE choice below that best explains your disposal data and complete the required tables.

- a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)
- b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at [www.ciwmrb.ca.gov/LGCentral/Forms/nytnmdrq.doc](http://www.ciwmrb.ca.gov/LGCentral/Forms/nytnmdrq.doc))
- c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at [www.ciwmrb.ca.gov/LGCentral/Forms/nytnmdrq.doc](http://www.ciwmrb.ca.gov/LGCentral/Forms/nytnmdrq.doc))

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. Note: The Board expects the jurisdictions to be able to provide all back-up documentation, if requested. Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids (e.g., concrete, asphalt, dirt), white goods, and scrap metal, please identify those programs/wastes types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.

\*Please provide detailed Non-Residential waste information in Section 9.

<b>Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.</b>						
Diversion Activity	Actual tons	Relative Percent to Total Generation	Specific Material Type(s) [List operation w/multiple materials in one box]	Specific Conservation Factor Used (If any) and Source	Type of Record and Location of Record

## **9. Specific Non-Residential Sector Waste Audits--Top 10 Non-Residential Generators**

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.

**(Table will perform all addition calculations.)**

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey

Summarize the non-residential diversion activities for the top 10 generators quantification methodology, and applicable conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

Asphalt & Concrete Grindings were quantified using actual weights

Old Produce Composting was quantified by using the same formula used to report residual wastes in DRS. The formula is determined by their backhauling tonnages.

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concreter, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

**Note:** program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept.").

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Inert Solids	▼ City CIP C&D diversion	1991	11418
Inert Solids	▼ Commercial collection (a portion of this is C&D)	1996	11683
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		
Pull Down for Waste Types	▼		

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

**Note:** If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information.

(Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼	
Pull Down for Waste Types	▼

Pull Down for Waste Types	▼	

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

## Central Contra Costa 2000 Home Composting Figures

The CCCSWA offers a home composting education program that includes free workshops, discount compost bins, and a garbage rate discount for certified home composters. In order to be certified as a home composter, households must complete forms and send in a photo of their home composting system. The certification lasts for one year, at which time the home composter must re-certify, or lose certification and the garbage rate discount. While most applications for certification are approved, some are not. The composting system must appear to be well maintained and safe.

In 2000, Bart Carr, the CCCSWA's composting consultant, surveyed all Central Contra Costa certified home composters. Using the composting amounts reported by residents, Bart determined that each home composting residence diverts, on average, 2844 lbs of material per year, or 237 lbs per month.

Table 1. Total number by city of certified composters actively composting in 2000

Year	Lafayette	Danville	Walnut Creek
2000	223	153	590
